## An industry for the future

*Sustainable energy generation is the topic of the 21<sup>st</sup> century. Offshore wind farms with gigantic capacities are being built all over the world. The advantages of offshore wind generation are obvious: steady and strong winds ensure twice the electricity yield of onshore wind generation, landscapes are not spoiled, and the vastly available space allows to build large wind farms and with that large power generation facilities; thus making them an actual alternative / substitute to conventional power generation.*

*To ensure the operation of an offshore wind farm, technicians are needed on site, offshore to maintain and service the wind turbines.*

*High-performance helicopters such as the Leonardo AW139, AW169 and the Airbus H145 are the industry standard and the perfect transportation in the harsh offshore environment.*

*With the rapid growth of offshore wind farms worldwide, the need for aircraft mechanics and certifying personnel will also increase in the coming decades.*

**A career field with a future, for an industry to which the future belongs.**

## We are HeliService

### Leader in offshore transportation, hoist operations, helicopter maintenance and HEMS.

With our focus on offshore helicopter transportation, maintenance for Leonardo and Airbus helicopters and HEMS (Helicopter Emergency Services), and with our over 30 years of experience, HeliService is one of the world's leading helicopter companies in its segment. Transporting maintenance personnel by high-performance helicopters to offshore wind farms offers numerous advantages: The transport by helicopter is vastly weather-independent, minimizes the sometimes considerable transport times of maintenance personnel and emits significantly less CO<sub>2</sub> per passenger than if transported by vessels. Lastly helicopters enable reduced downtimes of offshore wind turbines through a vastly faster and more reliable deployment of maintenance personnel. In our offshore business segment HeliService conducts crew change flights and Helicopter Hoist Operations (HHO) in which passengers are hoisted directly to vessels or wind turbines.

Our Intelligent Maintenance System (IMS) - supported, professional in-house maintenance comes to the benefit of our own helicopter fleet as well as to the benefit of our external maintenance customers. As an Leonardo Excellent Service Centre, HeliService offers maintenance of Leonardo's AW109, AW169 and AW139 helicopters as well as the Airbus helicopters H145 C2 and H145 D2. The most significant advantage for HeliService maintenance customers: The absolute time and cost commitment and the web-based Intelligent Maintenance System (IMS). Here our customers can follow the maintenance progress of their helicopters in real-time.

HeliService's third field of activity is Helicopter Emergency Services (HEMS). We provide aircrew and appropriately equipped helicopters for rescue. HeliService is now active in England, Poland, Taiwan and the USA, ensuring safe flight operations with Leonardo and Airbus helicopters. Through our offshore transport services, HeliService supports the all-important shift towards sustainable energy generation through regenerative offshore wind power generation.

**J. O. Freiland**  
Managing Partner

## Worldwide opportunities

As an international and globally growing company, HeliService offers numerous opportunities and possibilities.

Become part of the HeliService team and already benefit from worldwide exchange programs to Taiwan, the USA, England, Poland or within Germany. Further locations, and thus additional exchange options, are already being planned. The advantages at a glance:

- HeliService offers numerous international rotation opportunities
- Employees from more than 38 nations work at HeliService
- With offshore as its core business, HeliService is in an absolute growth market
- HeliService is one of the world's leading helicopter maintenance companies (MRO)

## Career opportunities in many fields

### Licensed aircraft engineer

You are an EASA Part 66 Cat. A, Cat. B1.3 or B2 (and C) licensed engineer? At this point HeliService is operating and/or maintaining Leonardo AW109 / AW169 and AW139 as well as Airbus BK117 C2 and D2. An existing type rating on any of those helicopter types would be preferred; however we also consider applicants with other type ratings. HeliService will then offer a type rating course for one or several of the helicopter types we currently operate or maintain.

HeliService offers also/and especially for experienced staff attractive development opportunities to becoming e.g. a shift leader / deputy supervisor / supervisor or manager for an entire site.

### Aircraft mechanic

You are an aviation enthusiast, team player, motivated and eager to progress your career as an aircraft technician? Then join us and become an important part of our team. We consider applicants with some basic aviation experience or even none.

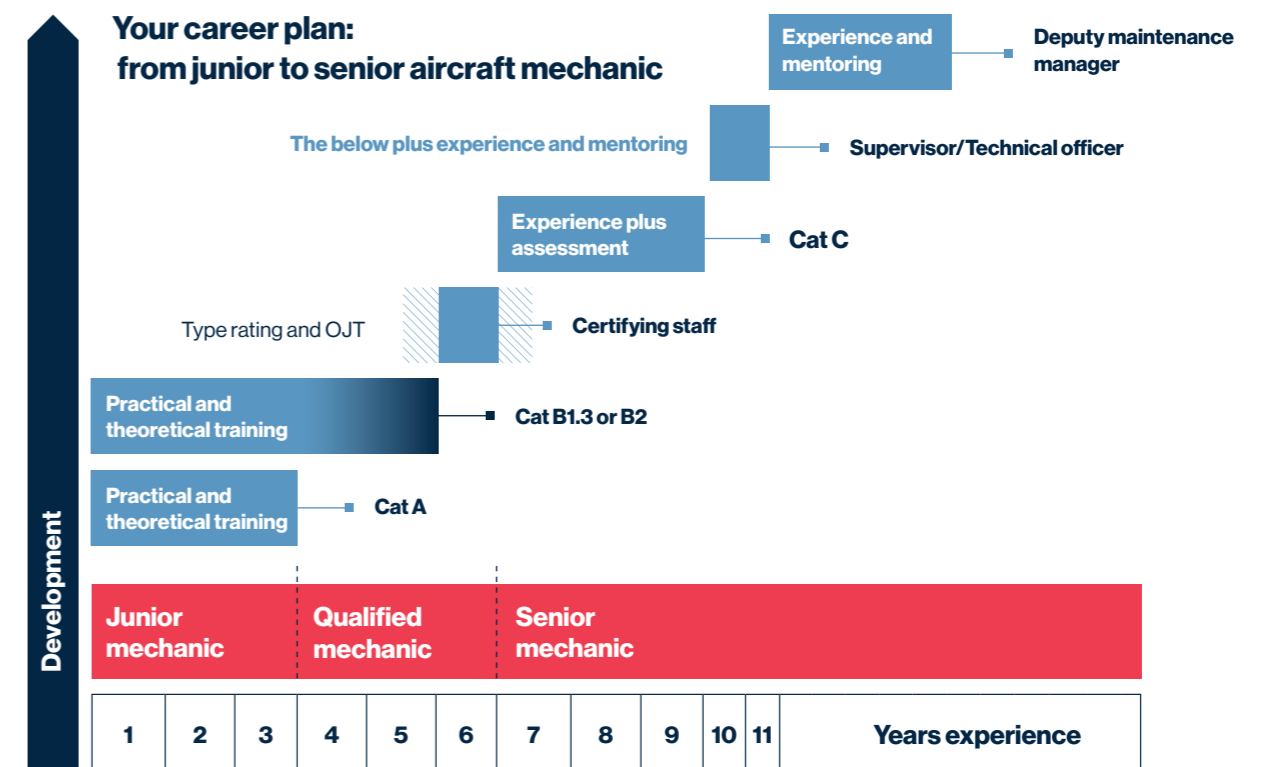

### Technical office engineer

You have experience in maintenance planning and programs and are well familiar with maintenance materials, manuals, service bulletins, airworthiness directives. Then join our technical office team. We also consider applicants who do not have long standing experience in the field of maintenance planning but would wish to develop in that area.

We are also constantly looking for other positions, such as:

- Pilots (AW139, AW169)
- CAMO engineer
- General administration

All open positions:

# HeliService benefits

**As a company with high social standards, HeliService offers its employees numerous benefits:**

Benefits offered range from company accommodation in company-owned, modern and well-equipped boarding houses, to various financial incentives and support with relocation up to tax support.

HeliService puts particular emphasis on the wellbeing and development of its employees. Benefits range from financial benefits, health promotion and training to career development.

## Employee accommodations

**When it comes to finding housing or accommodation, HeliService actively supports its employees.**

### HR onboarding support

- Local authorities support
- Support on visas and work permits

### Company housing

- HeliService own company house in Munich / Oberpfaffenhofen
- HeliService own company house in Emden

»Not only are you working in a growing company, but you're also working in a company that cares about the growth of their employees.«

**Katja Kopfer**  
Head of Human Resources

## Other additional company benefits

**HeliService attaches particular importance to its own employees. Benefit from numerous amenities in the areas to finance, health promotion and career opportunities.**

### Financial benefits

- Company pension plan
- Relocation support
- Advice/support on social security, tax, childcare support and the likes

### Health benefits

- Company health program
- Company-owned gyms

### Career development

- Aircraft specific training program
- Management training
- International job rotation option
